1 Typesetting instructions – please read carefully

Please comply with the following instructions when preparing your article for a LIPIcs proceedings volume.

- Use pdflatex and an up-to-date LaTeX system.
- Use further LaTeX packages only if required. Avoid usage of packages like `enumitem`, `enumerate`, `cleverref`. Keep it simple, i.e. use as few additional packages as possible.
- Add custom made macros carefully and only those which are needed in the article (i.e., do not simply add your convolute of macros collected over the years).
- Do not use a different main font. For example, the usage of the `times`-package is forbidden.
- Provide full author names (especially with regard to the first name) in the `\author` macro and in the `\Copyright` macro.
- Provide one affiliation per authors in the `\affil` macro, even if two or more authors have the same affiliation.
- Fill out the `\subjclass` and `\keywords` macros. For the `\subjclass`, please refer to the ACM classification at <http://www.acm.org/about/class/ccs98-html>.
- If you refer to a longer version of the paper (“full version”), please make sure to provide a persistent URL, e.g., at arXiv. Preferably mention this full version in a footnote attached to the title.
- Take care of suitable linebreaks and pagebreaks. No overfull `\hboxes` should occur in the warnings log.
- Provide suitable graphics of at least 300dpi (preferably in pdf format).

- Use the provided sectioning macros: `\section`, `\subsection`, `\subsection*`, `\paragraph`, `\subparagraph*`, ... “Self-made” sectioning commands (for example, `\noindent{\bf My subparagraph.}`) will be removed and replaced by standard LIPICs style sectioning commands.
- Do not alter the spacing of the `lipics-v2016.cls` style file. Such modifications will be removed.
- Do not use conditional structures to include/exclude content. Instead, please provide only the content that should be published – in one file – and nothing else.
- Remove all comments, especially avoid commenting large text blocks and using `\iffalse ... \fi` constructions.
- Keep the standard style (`plainurl`) for the bibliography as provided by the `lipics-v2016.cls` style file.
- Use BibTeX and provide exactly one BibTeX file for your article. The BibTeX file should contain only entries that are referenced in the article. Please make sure that there are no errors and warnings with the referenced BibTeX entries.
- Use a spellchecker to get rid of typos.
- A manual for the LIPICs style is available at <http://drops.dagstuhl.de/styles/lipics-v2016/lipics-v2016-authors/lipics-v2016-manual.pdf>.
